

STEM Summer Camp

2019 AT TAMPA CATHOLIC HIGH SCHOOL

“When will the camp be?”

Date and Time

This camp will be a total of 8 days.

June 10-13 9am-12pm

June 17-20 9am-12pm

Final Project Presentations
June 20 12-2pm

“Where will it be?”

Location

Tampa Catholic High School
4630 N Rome Ave
Tampa, FL 33606

Science Labs, Hurley Center

“How do I sign up?”

Registration

ONLY \$250 to register!

Limited spots!

To register you will go to

<https://www.tampacatholic.org/products/2019-stem-camp>

by May 24th.

Tampa Catholic High School
a tradition of Faith, Excellence & Family

“WHAT IS THE CAMP ABOUT?”

This camp is for current 6th-8th graders to explore topics in anatomy, diseases, and animal adaptations through an Engineering focus. They will complete four sets of curricula filled with mini lessons, projects, and games!

June 20th 12-2pm: Final Project Fair!

For the entire camp students will be working in groups on final projects for the four lessons. At the end of the camp they will pick one project to present at the fair! There will be a small reception for friends, family, and the TC community to come and see the student's exhibitions!

“What will the students be learning?”

The best thing about this camp is it won't even feel like learning!

- Students will explore the how a virus works, and design ways to stop them.
- They will study anatomy through a dissection to then use this knowledge to design protective helmets and prosthetics for animals.
- Students will also explore animal adaptations to be inspired to design something for people to wear!

“To myself I am only a child playing on the beach, while vast oceans of truth lie undiscovered before me.”

-Isaac Newton-

“What do we need to do to sign our student up for this amazing summer camp?”

1. This camp is for students currently in 6th or 7th or 8th grade.
2. The camp can only take 60 students, so it is first come, first served.
3. To register you will go to <https://www.tampacatholic.org/products/2019-stem-camp> and sign up and pay the \$250 registration fee.
4. You will be emailed permission slips and media release forms that must be completed and handed in on the first day of the camp.

We are so excited to host the first ever TC STEM Camp to help provide students with a learning environment that is project based and student led. They will get to explore topics that interest them and practice engineering skills that will help them see the practicality of what they learn in school.

Come and experience how much fun learning can be!
